

Loops Practice 2! (Basic While Loops)

The practices here are meant to improve your coding skills. We won't be coding trading strategies. Instead, we will solve some math/logic problems.

Solve the following using While Loops.

Question 1

Print out all numbers from 0 to 9.

Question 2

Print out all numbers from 2 to 15.

Question 3

Sum all numbers from 1 to 100. Print the answer.

Question 4

Sum all odd numbers from 1 to 100. Print the answer.

-

The answers are in this chapter's Dropbox folder. Look for the ipynb file titled "Loops Practice 2 - Basic While Loops (ANSWERS).ipynb"

There will be a lecture later to explain the answers to some of the harder questions.
